

So you've decided to sign up for Swagbucks! (If you haven't yet, [be sure to click here](#) to create your free account.) What an awesome way to get free gift cards, whether to Amazon, Starbucks, or your favorite restaurant! I earn at least \$25 a month on Swagbucks, sometimes up to \$50 or more depending on how much time I put into it. You can do the same! Here are my secret tips that I follow every time I get on Swagbucks; use these shortcuts and hints and start earning more.

Put the shortest videos on your Favorites in the SBTV apps

The Swagbucks video apps are an easy way to earn Swagbucks; you start the app and a video, and just sit back and watch the Swagbucks rack up. You've probably noticed that it can take awhile to earn because some of the videos are just so long! My trick is to find the shortest video (Usually 10-15 seconds long) and add it to my Favorites. That way, all I have to do is visit my Favorites and click on that one video, and it'll just replay that video over and over. Quick and easy! [This Reddit page](#) has a full and updated list of the shortest videos for each app, and I refer to that every time the videos change.

Join the Swagernauts Facebook group

Make sure you [request to join this Facebook group](#)! It's full of people obsessed with Swagbucks like you and me, and they post any good finds they come across. If there's a great-paying survey, or new special offer in the Discover section, you can usually find out about it here! If I can't seem to complete surveys that day, I'll visit this group to get ideas on how to make my daily goal.

Use the secret to Ncraves

I use Ncraves often to earn easy Swagbucks. Usually with Ncraves, you have to click to get to the next video to complete each one. See the little circle next to these Ncraves? That means they run automatically. Just click on one, and it'll run through each video by itself. Check back after a few minutes, close it out, and do it again!

Randomly in the evenings, I've noticed that Ncraves will have high-paying videos. The average payout is 4-6 per Ncrave, but I've also seen 8-9 Swagbuck videos. Do those as often as you can, because they never last long!

Filter through the Discover Offers

Sometimes you have to dig to find the good special offers here. The ones I do that I know work are: The Coupons.com offers (worth 3-6 Swagbucks), the Daily Break offers (worth 6-15 Swagbucks), and some of the games offers (worth 100+ Swagbucks). The only game offers I do are the ones you can play through Facebook; I don't install games on my phone or computer. It takes me a few days to get these Swagbucks because usually you have to play until you reach a certain level; but you can earn 100 Swagbucks or more, which is nice if you like playing games!

Also, keep an eye out for Double SB days in the Discovery section. Take advantage of that when you can; I once clicked on a game offer that paid me 400 Swagbucks after I reached a certain level!

These are the exact things I do every day and try to earn about 100 Swagbucks per day. That's usually enough to get my first daily goal and get a really big bonus at the beginning of the next month! Be sure to [create your Swagbucks account here](#) and get started earning today!
